Summary

With over 5 years of dedicated experience as a Frontend Developer, I have specialized in creating dynamic and user-friendly business applications for a diverse range of clients in the Fintech, Insurance and Government sectors. My proficiency lies in harnessing the power of cutting-edge technologies, such as React, JavaScript, TypeScript, Next.js to deliver solutions that seamlessly blend innovation and functionality. My unwavering commitment has enabled me to consistently exceed client expectations and drive business growth.

1. NFT Marketplace

Developed NFT Marketplace with MetaMask integration.

Technologies: React, MaterialUI, Ethereum, ethers.js

2. Research Portal

Developed a Web platform for displaying/publishing research articles.

Technologies: React, NodeJS and Apollo GraphQL Server were used for back-end implementation.

3. UI prototype for Real-time trading platform.

Developed a prototype for a real-time trading platform.

Technologies: React / MaterialUI.

4. Multiple projects for companies within the Fintech sector

Developed an account view application to query and analyze trading data (dynamic data grids and charts). Multiple grids and forms to manage various trades and swap baskets.

Technologies: React / DevExtreme DataGrid, Charts, Redux, Redux-Saga, AG Grid, antd.

5. Public web portal

Developed public website using JAM Stack.

Technologies: React, Next.js, Tailwind CSS, Storyblok CMS

6. Mailchimp integration plugin for headless CMS.

Developed a plugin for publishing CMS content to Mailchimp audience groups.

Technologies: Next.js for API, Vue.js / Nuxt.js.
