Portfolio

Summary

Dedicated Frontend Developer with over 5 years of experience in creating dynamic and user-friendly business applications for clients in the Fintech, Insurance, and Government sectors. I excel in harnessing cutting-edge technologies, including React, JavaScript, TypeScript, and Next.js, to deliver innovative solutions that drive business growth and consistently surpass client expectations.

Key Achievements:

- Spearheaded the development of multiple Fintech web applications, enhancing user experiences and delivering solutions that meet client needs.
- Leveraged JavaScript, React, GraphQL, Apollo, Jest, and react-testing-library to optimize application performance and user experience.
- Collaborated closely with the backend team to create robust APIs, ensuring seamless data integration.
- Successfully implemented mobile responsive designs, resulting in enhanced usability and user engagement.
- Reduced project timelines by 20% through efficient coding practices and collaboration with cross-functional teams.
- Delivered measurable improvements in application speed, resulting in a 15% increase in user engagement and satisfaction.

I consider myself a highly responsible person and I truly value a company's trust in its employees. I will be happy to work in an international team of experienced developers. I hope to bring value to your company as well as have a possibility to learn from experienced colleagues. I am ready for relocation.

Work Experience

28Stone Consulting, Inc., Riga, Latvia   04/2020 - current
